PLANT AND SOIL

Contents Volume 305 Nos. 1–2 April 2008

Part I

Sixth International Workshop on Xylem Sap Flow

Guest editor:
Stephen S. O. Burgess

Editorial

Taking the pulse of the land
S.S.O. Burgess **1–3**

Using branch and basal trunk sap flow measurements to estimate whole-plant water capacitance: a caution
S.S.O. Burgess and T.E. Dawson **5–13**

A simple field validation of daily transpiration derived from sapflow using a porometer and minimal meteorological data
I.A.M. Yunusa · I.K. Nuberg · S. Fuentes · P. Lu and D. Eamus **15–24**

Erratum

The upscaling of transpiration from individual trees to areal transpiration in tree belts
R.S. Crosbie · B. Wilson · J.D. Hughes and C. McCulloch **25–34**

A modified Jarvis-Stewart model for predicting stand-scale transpiration of an Australian native forest
R. Whitley · M. Zeppel · N. Armstrong · C. Macinnis-Ng · I. Yunusa and D. Eamus **35–47**

Variations in the radial gradient of sap velocity in trunks of forest and fruit trees
Y. Cohen · S. Cohen · T. Cantuarias-Aviles and G. Schiller **49–59**

Scots pine root distribution derived from radial sap flow patterns in stems of large leaning trees
J. Čermák · N. Nadezhdina · L. Meiresonne and R. Ceulemans **61–75**

Linking xylem diameter variations with sap flow measurements
S. Sevanto · E. Nikinmaa · A. Riikonen · M. Daley · J.C. Pettijohn · T.N. Mikkelsen · N. Phillips and N.M. Holbrook **77–90**

The use of sap flow measurements for scheduling irrigation in olive, apple and Asian pear trees and in grapevines
J.E. Fernández · S.R. Green · H.W. Caspari · A. Diaz-Espejo and M.V. Cuevas **91–104**

Seasonal variation of water uptake of a *Quercus suber* tree in Central Portugal
N. Nadezhdina · M.I. Ferreira · R. Silva and C.A. Pacheco **105–119**

The response of sap flow to pulses of rain in a temperate Australian woodland
M. Zeppel · C.M.O. Macinnis-Ng · C.R. Ford and D. Eamus **121–130**

Forest-scale sap flux responses to rainfall in a dryland eucalyptus plantation
H.D. Morgan and C.V.M. Barton **131–144**

Part II

Regular Articles

Effect of soil biota on growth and allocation by *Eucalyptus microcarpa*
M. Bourne · A.B. Nicotra · M.J. Colloff and S.A. Cunningham **145–156**

The effect of afforestation with Scots pine (*Pinus silvestris* L.) of sandy post-arable soils on their selected properties. I. Physical and sorptive properties
M. Olszewska and H. Smal **157–169**

The effect of afforestation with Scots pine (*Pinus silvestris* L.) of sandy post-arable soils on their selected properties. II. Reaction, carbon, nitrogen and phosphorus
H. Smal and M. Olszewska **171–187**

Biomass allocation and nutrient use in fast-growing woody and herbaceous perennials used for phytoremediation
A. Adler · A. Karacic and M. Weih **189–206**

Root tensile strength and root distribution of typical Mediterranean plant species and their contribution to soil shear strength
S. De Baets · J. Poesen · B. Reubens · K. Wemans · J. De Baerdemaeker and B. Muys **207–226**

Fine root vertical distribution and temporal dynamics in mature stands of two enset (*Enset ventricosum* Welw Cheesman) clones
S. Zewdie · M. Fetene and M. Olsson **227–236**

Aggregation and C and N contents of soil organic matter fractions in a permanent raised-bed planting system in the Highlands of Central Mexico
K. Lichter · B. Govaerts · J. Six · K.D. Sayre · J. Deckers and L. Dendooven **237–252**

Mapping QTLs for root traits under different nitrate levels at the seedling stage in maize (*Zea mays* L.)
J. Liu · J. Li · F. Chen · F. Zhang · T. Ren · Z. Zhuang and G. Mi **253–265**

Establishment of arbuscular mycorrhizal plants originating from xerothermic grasslands on heavy metal rich industrial wastes–new solution for waste revegetation
K. Turnau · T. Anielska · P. Ryszka · S. Gawroński · B. Ostachowicz and A. Jurkiewicz **267–280**
